Professional Summary

Full-stack engineer with 5+ years of experience building web and mobile products across marketplaces, payments, logistics, and market research. Led the product team at Malokun Labs while designing and building product features across databases, APIs, and user interfaces. Built GetUrgent2K's marketplace, admin dashboard, and payment system end to end. Also built the Service Me mobile app and Ask ERI, a Next.js platform for exploring field research from Lagos markets. Core stack includes Next.js, React, TypeScript, Laravel, and Node.js/NestJS, with additional experience in React Native and Solidity.

Professional Experience

Malokun Labs | Lead Developer & Head of Product Team

June 2025–Present · In current role since June 2026

- Lead the product team and oversee frontend and backend development from requirements through implementation.
- Built GetUrgent2K's marketplace interface, backend, admin dashboard, and payment workflows.
- Implemented partner sign-in with a server-to-server account check and a short-lived signed redirect.
- Built the responsive Eri company website and Ask ERI from scratch using Next.js.

Service Me | Full-Stack App Developer · August 2024–June 2025

- Built the mobile app for ride booking and package delivery. Developed the Laravel backend and Next.js web frontend.

Cen Consulting | Developer · November 2023–August 2025

- Built and maintained company and client websites and delivered technical training.

NUTLIP | Full-Stack Developer · November 2023–November 2024

- Built database modules and APIs for a real estate platform with property listings, payments, and chat.

NEX Consulting | Full-Stack Developer · November 2023–August 2024

- Built and maintained client websites and contributed reusable components and responsive layouts.

Mainfield Consultants | Developer & Trainer · November 2022–August 2023

- Built client websites and trained agency teams on web tools.

Blueprint Newspaper | Developer Intern · January 2020–January 2021

- Helped modernize the publication's website and maintain its database.

Selected Projects

GetUrgent2K — Gig Marketplace & Payments

Built the Next.js interface, Laravel backend, MySQL data layer, and admin dashboard. Integrated Paystack for job escrow, referral payouts, and withdrawals.

Ask ERI — Market Intelligence Platform

Built the platform end-to-end with Next.js, including an interface for exploring merchant survey findings and field briefs from Lagos markets.

Vault — Content Licensing Platform

Built a platform where brands and creators publish content and license it for use by other businesses and creators.

Service Me — Ride Booking & Package Delivery

Built mobile workflows for booking rides and requesting deliveries, working with Ionic and React Native with Expo.

Quick Answers — Online Form Builder

Built a full-stack application with Next.js and NestJS that lets users create and publish online forms.

NFT Marketplace — Smart Contracts & Trading

Built a marketplace for minting, buying, and selling NFTs using Solidity smart contracts.

Technical Skills

Frontend: React, Next.js, Vue 3, TypeScript, JavaScript, Tailwind CSS

Backend: Laravel, PHP, Node.js, NestJS, Express, REST APIs, GraphQL

Mobile: React Native, Expo, Ionic, Capacitor

Data and deployment: MySQL, PostgreSQL, MongoDB, Git, Docker, CI/CD, Vercel, Laravel Forge

Payments and Web3: Paystack, Solidity, Foundry, Ethers.js

Education

BSc in Mathematics and Statistics · Federal University of Technology, Minna
